SUMMARY

Passionate and self-motivated student on a journey to become a full-stack web developer. With a strong proficiency in JavaScript, HTML, CSS, and Java, I'm dedicated to mastering web technologies and building dynamic, user-focused applications.

EDUCATION

Software Engineering Bootcamp   Sept. 2023 - Current

UMass Global Online Bootcamp   Remote

- Completed real-world projects to master multiple languages and excel in both front-end and back-end development

Madison Area Technical College   Jan. 2023 - Current

Java Professional Developer Certificate   Madison, WI

- Utilized Java Servlets, JDBC, JavaServer Pages, and JavaBeans to develop dynamic web applications

Wilbraham & Monson Academy   Aug. 2018 - May. 2022

High School Diploma   Wilbraham, MA

- Demonstrated a deep understanding of object-oriented programming through the completion of AP Computer Science

SKILLS

Frontend
- JavaScript, React, HTML, CSS

Backend
- Python, Java, C++

User Interface
- JavaFX, Swing

Operating Systems
- Windows, Ubuntu, MacOS

PROJECTS

Weather App

A user-friendly web tool for conveniently accessing current weather conditions and forecasts in specific locations, developed with JavaScript, Axios, jQuery, HTML, and CSS.

Calendar

Designed a custom calendar system for event management, allowing users to easily schedule and organize their activities. Built using React, React Router, JSX, and CSS.

Wordle

Challenge your word-guessing skills with the classic web game, Wordle. This project presents a Java and JavaFX implementation, highlighting proficiency in Java development and UI design.
